

UNIVERSITY OF AMSTERDAM
Institute for Information Law

IViR Lunch Lecture

The Quantum Age

by Prof. Chris Hoofnagle
(Berkeley Center for Law
& Technology)

Friday
19 April 2024
REC A5.24

www.ivir.nl/events/

In *Law and Policy for the Quantum Age* (Cambridge University Press 2022, open access), Simson Garfinkel and Chris Hoofnagle argue that quantum sensing—not a collapse of cryptography—is the most important near-term implication of quantum technologies.

In this talk, Prof. Hoofnagle will explain the landscape of quantum technologies, their strategic consequences, and likely scenarios for the quantum age.

Chris Jay Hoofnagle is professor of law in residence at UC Berkeley law and a visiting scholar at King's College London Department of War Studies.

Hoofnagle is a member of the American Law Institute and author of three books:

- *Cybersecurity in Context* (forthcoming 2024 with Golden G. Richard III);
- *The Quantum Age* (2022 with Simson Garfinkel);
- *FTC Privacy Law and Policy* (2016).

Practical details:

Date: 19 April 2024

Time: 12.30-13.45

Location: IViR Room,
REC A5.24, Nieuwe
Achtergracht 166, 1018
WV Amsterdam
