

UNIVERSITY OF AMSTERDAM  
Institute for Information Law

# Conference:

# Rethinking Media Law and Policy for Europe

Friday  
6 October  
2023

[www.ivir.nl](http://www.ivir.nl)

The media landscape has undergone significant structural transformations in the past decades, raising complex challenges for media law and policy. The dominant role of digital platforms in the communications ecosystem has had a disruptive impact on the sustainability of news media as well as on the quality and accuracy of information products. In increasingly politicised media environments, journalists and other media actors face sustained political pressure, attacks and distrust. The evolution of generative AI systems poses new challenges and may change the development and remuneration of news and media productions profoundly.

In sessions that leave ample room for discussion, the Conference will address:

- Constitutional and Institutional Changes and Challenges
- Public Interest, Quality, Pluralism – Regulatory Questions
- Financial Sustainability and Press Publishers’ Right
- Technology Impact – Platforms and AI

The full programme can be found on [www.ivir.nl/rmlpe/programme](http://www.ivir.nl/rmlpe/programme)

### Information and practical details:

---

The Conference offers a unique opportunity to hear more about the main outcomes of the project and discuss new directions in news and media law from a practical and policy-oriented perspective.

---

The afternoon programme is offered in cooperation with the Dutch copyright association (Vereniging voor Auteursrecht). For VVA members who wish to obtain PO points, the usual sign in and sign out rules apply.

---
