Distinguished IViR Lecture 2023

Regulating Artificial Innovation
and Information:
Is IP Law Up to the Task?

Prof. Daniel Gervais

Please register here

We are 

As innovation in almost all fields previously reserved for human endeavors is now increasingly produced by Artificial Intelligence, machines, what changes, if any, do we need to make to IP Laws?

This talk will discuss the role of IP law—and indeed law more generally—in charting the future course of AI development.

Speaker

Prof. Daniel Gervais is the Milton R Underwood Chair in Law at Vanderbilt University. He is member of the American Law Institute and of the Academy of Europe. He is a past President of the International Association for the Advancement of Teaching and Research in Intellectual Property (ATRIP).
